EDUCATION

University of California, Irvine

June 2023

B.S. in Informatics: Human-Computer Interaction (HCI)

TECHNICAL SKILLS

Programming Languages: JavaScript/TypeScript, JSX/TSX, HTML, CSS, Python, C++, Java, R

Operating Systems: Windows (10.7, 10.8, 11), Mac (El Capitan, Catalina)

Concepts: Human-centered design process, system requirements, agile project management (scrum), social ergonomics, user interface design, prototyping

Software: Visual Studio Code, React, React Native, Next.js, Angular, Github, Figma, Jira, Notion, Eclipse, Atom, Miro

WORK EXPERIENCE

Nutripair

UX Designer / Front-End Development Intern | Irvine, CA

June 2022-September 2022

- Created reusable functional components and four dynamic web-application pages
- Transitioned Figma mock-ups to React and Next.js framework
- Designed API file structure and programmed API calls to AWS and MongoDB server
- Collaborated with team members through an agile project management on Jira

Amazon

Grocery Fresh Associate | Irvine, CA

January 2022-August 2022

- Monitored delivery orders using supply chain management software
- Managed warehouse inventory and conducted order quality reports

PROJECTS

Spotify Angular Browser

Front-End Developer

November 2022

- Programmed HTTP requests using in to fetch from Node.js/Express server
- Created frontend interface to display dynamic Spotify API artist, album, and track data

Nutripair Restaurant Portal Capstone

UX Designer / Front-End Developer

April 2022-June 2022

- Wrote a software requirements specification document based upon elicitation meetings with Nutripair development team
- Constructed use-case models to cover user interactions with system features
- Designed high-fidelity mockups via Figma for Nutripair's restaurant portal based on provided wireframes
- Developed static pages for Nutripair's restaurant portal using React

Anteater Wellness App

Software Designer / UX/UI Designer

January 2022-March 2022

- Designed a software requirements specification document for UCI's Wellness, Health, & Counseling Services to promote health wellness for UCI students
- Directed elicitation sessions with stakeholders, wrote software requirements, goal models, use-case scenarios/diagrams, and domain models
- Built high-fidelity user interface mockups for system features via Figma

Canvas CMS Revamp

Scrum Master / UX/UI Designer

October 2021-December 2021

- Led a project team of four to redesign the Canvas assignments desktop webpage (assignment posting, scheduling, viewing, editing, submitting)
- Gathered research from UCI students on Canvas issues and created personas for potential users of the CMS
- Managed scrum sprints, user story assignments, backlogs, team velocity, burn down charts, Gantt charts, WBS
- Created UI mockups for system features via Figma
- Presented prototype and project report to simulated UCI's Office of Information Technology board

AWARDS

Dean's Honor List

- 4x Dean's Honor List recipient

ACTIVITIES

Blockchain at UCI

Member

October 2021-Present

- Held events with various blockchain-oriented companies and met with blockchain research professionals
- Collaborated with other members for various workshops and informational sessions

Jamba Juice

Team Member | Puente Hills, CA

June 2019-September 2019

- Cross-trained and able to work all positions: cashier, beverage assembly, pour station, maintenance, inventory, accounting
- Developed expertise in multi-tasking, customer service, communication, and team collaboration under a fast-paced service environment

LEADERSHIP**The National Society of Leadership and Success**

February 2020 - Present

- Gain leadership insight from speaker broadcasts featuring celebrities, authors, motivational speakers, and industry leaders
- Connected to a nationwide network of honor students and mentors as well as a local community within my chapter

Eagle Scout Recipient

May 2019

- Held positions as senior patrol leader, assistant patrol leader, advancement mentor, and scribe.
- Mastered commitment and dedication skills as well as learning to lead by example
- Organized an Eagle Scout service project where I restored the public restrooms at Morgan Park located in Baldwin Park, CA

Canvas Revamp Description:

I led a project team of four to redesign the Canvas assignments desktop webpage (assignment posting, scheduling, viewing, editing, submitting). Serving as the scrum master for the project team as well as the UX/UI designer, I conducted research from UCI students on current Canvas issues and created personas for potential users of the CMS. Given a ten-week deadline, our team followed an agile approach for managing the project. I managed scrum sprints, user story assignments, backlogs, team velocity calculations, burn-down charts, Gantt charts, and WBS creation. In addition to this, I created UI mockups via Figma for the software system (linked in the attached document). This project was presented to a simulated UCI Office of Information and Technology board.
